

Expression of Interest Notice for TSK106 – Third Party Risk to Life

Without commitment or prejudice.

Thank you for registering your capabilities on the Unmanned Air Systems Capability Development Centre (UAS CDC) Open Supplier Register (OSR).

As such, you may be interested in receiving further details of a potential forthcoming UAS CDC opportunity that has arisen.

The UAS CDC has received an initial requirement to understand what software models might be available to help inform the understanding about Risk to Life posed by Class 1 UAS below 20Kg. In the first instance, we are seeking to understand what models may be available for use, their provenance and applicability to small UAS operations in the UK, with an aim;

- a) through modelling to generate verifiable scenarios in which RtL may be determined for a range of SUAS operations in the UK;
- b) to better understand the current assumptions regarding the RtL posed by small UAS.

If you are interested in this opportunity, please confirm your interest in writing providing a brief details on what models you have and any similar work you may have done in the past.

Responses should be forwarded to the UAS CDC email address below by close of play Monday 7th January 2019.
